DEALS LOST

3

VALUE LOST

\$25,900

EST. RECOVERABLE

\$12,560

Root cause confidence: 1 confirmed by data · 2 likely inference · 0 insufficient data

Stefan Ilic

MEDIUM SEVERITY

unknown · Deal value \$12,000 · Recoverable \$6,000

A discovery call indicated a strong fit and a proposal was sent, but only one follow-up email was recorded and it received no reply. No owner was assigned and no further follow-up is logged, so the opportunity likely went cold before a decision was captured.

PRIMARY FAILURE

LIKELY INFERENCE

Insufficient follow-up after the proposal (only one follow-up email was sent and it received no reply).

Evidence: Sep 19: One follow-up email, no reply. No further follow-up logged.

SECONDARY FAILURE

No owner was assigned to the opportunity, leaving no accountable person to drive continued outreach.

RECOMMENDED FIX

Assign an owner as soon as a proposal is sent and implement an automated follow-up cadence with task reminders (for example, 3 follow-ups over two weeks). Require recording a loss reason at close so future losses can be diagnosed and tracked.

Data completeness: PARTIAL · Missing data that would help: Official loss reason or competitor information, Any email threads or prospect replies after Sep 19, Assigned owner and follow-up task history

## Ana Jovanovic

MEDIUM SEVERITY

unknown · Deal value \$5,000 · Recoverable \$3,000

The lead submitted a Facebook form on Sep 21 and, per the notes, signed with another agency on Sep 22 because that agency called back the same day. Our first recorded outreach was on Sep 23 and no owner was assigned, so we did not reach her before she signed elsewhere.

PRIMARY FAILURE **CONFIRMED BY DATA**

Competitor responsiveness: the lead signed with another agency that called back the same day.

Evidence: First outreach call on Sep 23 at 14:05 (about 53 hours after the form). Lead said she already signed with another agency on Sep 22 because they called her back the same day.

SECONDARY FAILURE

No owner was assigned and the first outreach occurred roughly 53 hours after the form, so internal response time and routing failed.

RECOMMENDED FIX

Auto-assign inbound leads and set a one-hour response SLA with alerts for SLA misses. Add an immediate automated acknowledgement and an instant callback workflow for Facebook leads to ensure same-day contact.

Data completeness: COMPLETE · Missing data that would help: Exact timestamp when the Facebook lead was delivered to the CRM, Any automated acknowledgement or autoresponder sent to the lead, Identity or contact details of the competitor who signed the lead

## Marko Perkovic

MEDIUM SEVERITY

Booking Form · Deal value \$8,900 · Recoverable \$3,560

The lead was open for many days with no owner assigned and no notes or recorded loss reason, so it was likely lost due to lack of timely follow-up. Someone created re-engagement tasks only after the loss, indicating the account was not actively managed before closure.

PRIMARY FAILURE **LIKELY INFERENCE**

No owner was assigned, so the lead received no consistent follow-up.

Evidence: "ownerAssigned": false; "notes": []; "lossReasonRecorded": false

SECONDARY FAILURE

The team did not document communications or a loss reason, preventing recovery efforts and analysis.

RECOMMENDED FIX

Auto-assign booking-form leads or require owner claim within 24 hours and trigger SLA reminders for first contact; make recording a loss reason and a brief closing note mandatory before marking lost. Monitor unassigned or stale leads with alerts so re-engagement happens before the deal is closed.

Data completeness: PARTIAL · Missing data that would help: Detailed call/email notes or timestamps of contact attempts, Any recorded loss reason or competitor information, Owner assignment history or initial outreach records
